How does this year deliver your curriculum intent?		In Year 9, students build on their learning from Years 7 and 8. As well as recapping key material from years 7 and 8, to ensure the knowledge and skills are secure, they will also develop new knowledge across each of the Biology, Chemistry and Physics subjects taught. Although Year 9 is the first year of the three year GCSE course, many of the concepts and processes covered this year have been covered in Years 7 and 8. This year has been designed to act as a transition across the two key Stages.
